This free course, <i>Understanding autism</i> , introduces the autism spectrum , how it is experienced by different individuals and families, and why it is a global concern. The course explains how ideas about autism have evolved and explores diagnosis, causes, intervention and life-span development. Widely varying perspectives on autism	https://www.open.edu/openlearn/science-maths-technology/understanding-autism/

<p>are illustrated and key societal and cross-cultural issues highlighted</p>	
<p>Play, learning and the brain <i>The Open University</i> This course examines the area of brain-based learning, with a particular focus on the development of the young child's brain, and is of particular relevance to those who work with young children. We consider the implications of current understandings of brain development for teaching and learning, particularly in an early years setting, and finish by exploring the value of play (particularly outdoor play) in children's learning and the development of their brains.</p>	<p>https://www.open.edu/openlearn/education/educational-technology-and-practice/educational-practice/play-learning-and-the-brain/content-section-0?active-tab=description-tab</p>
